Lock Screen

Unlocking

- Unlocked by swiping down from anywhere on the screen
- When there are notifications, swipe down from the top of the list of notifications to unlock
- If the phone can not recognize your fingerprint, it will ask you to type your password

Navigation gestures

- To navigate to dialer straight from the lock screen, swipe from left
- To navigate to camera straight from the lock screen, swipe from right
- These gestures and placements of screens are hinted at the bottom of the screen

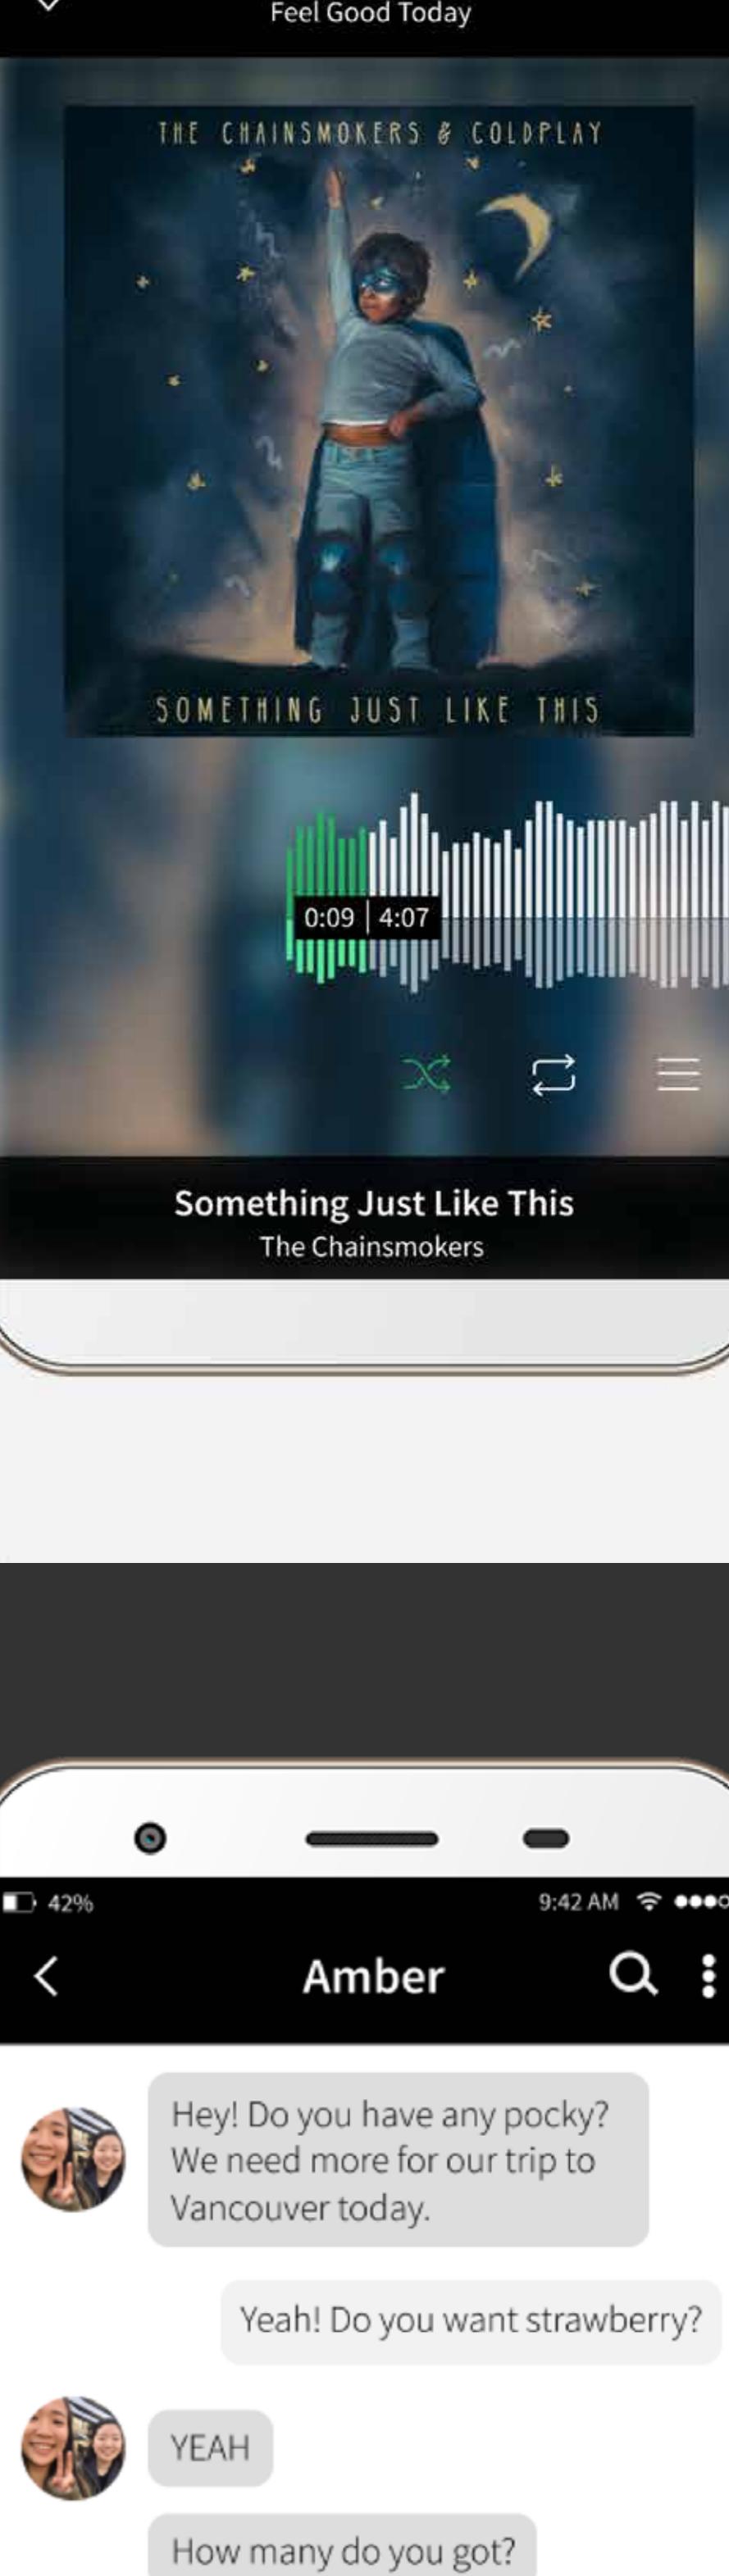

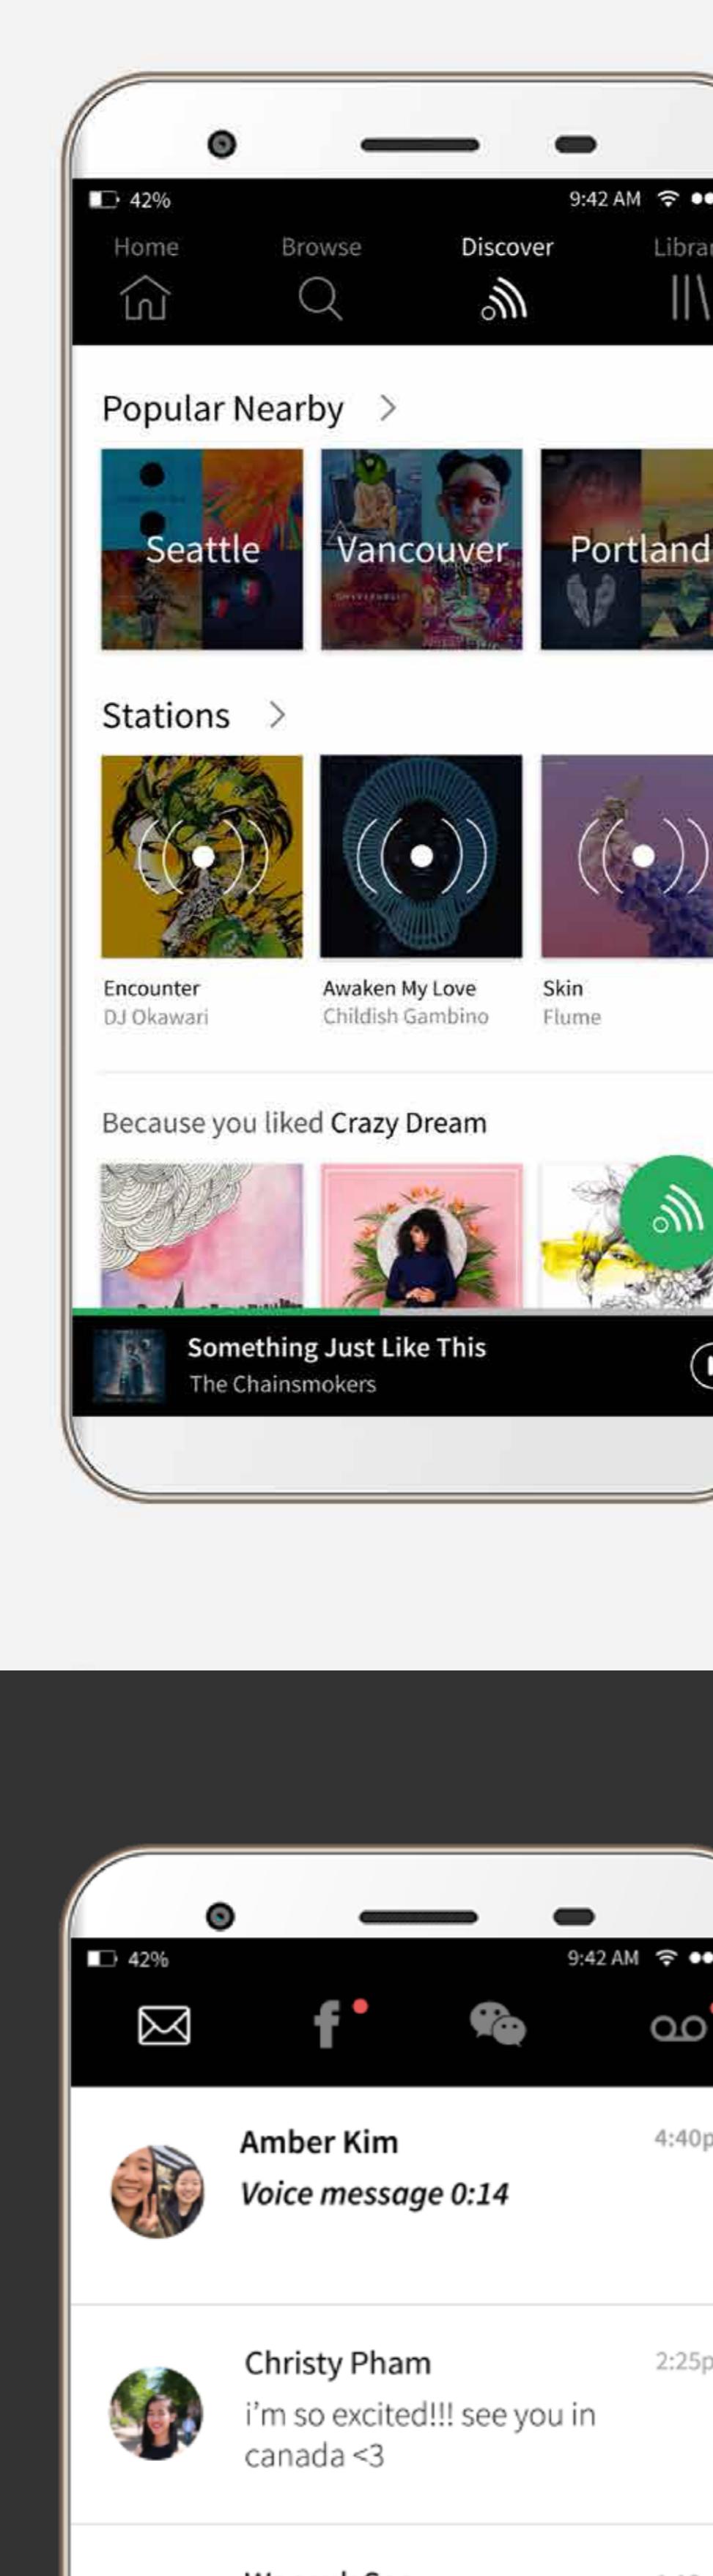

Home Screen

Widgets

- Only widgets can be added on home screen (no apps)
- Various widgets are available, including weather and music
- Developers can create widgets for their own apps

Navigation

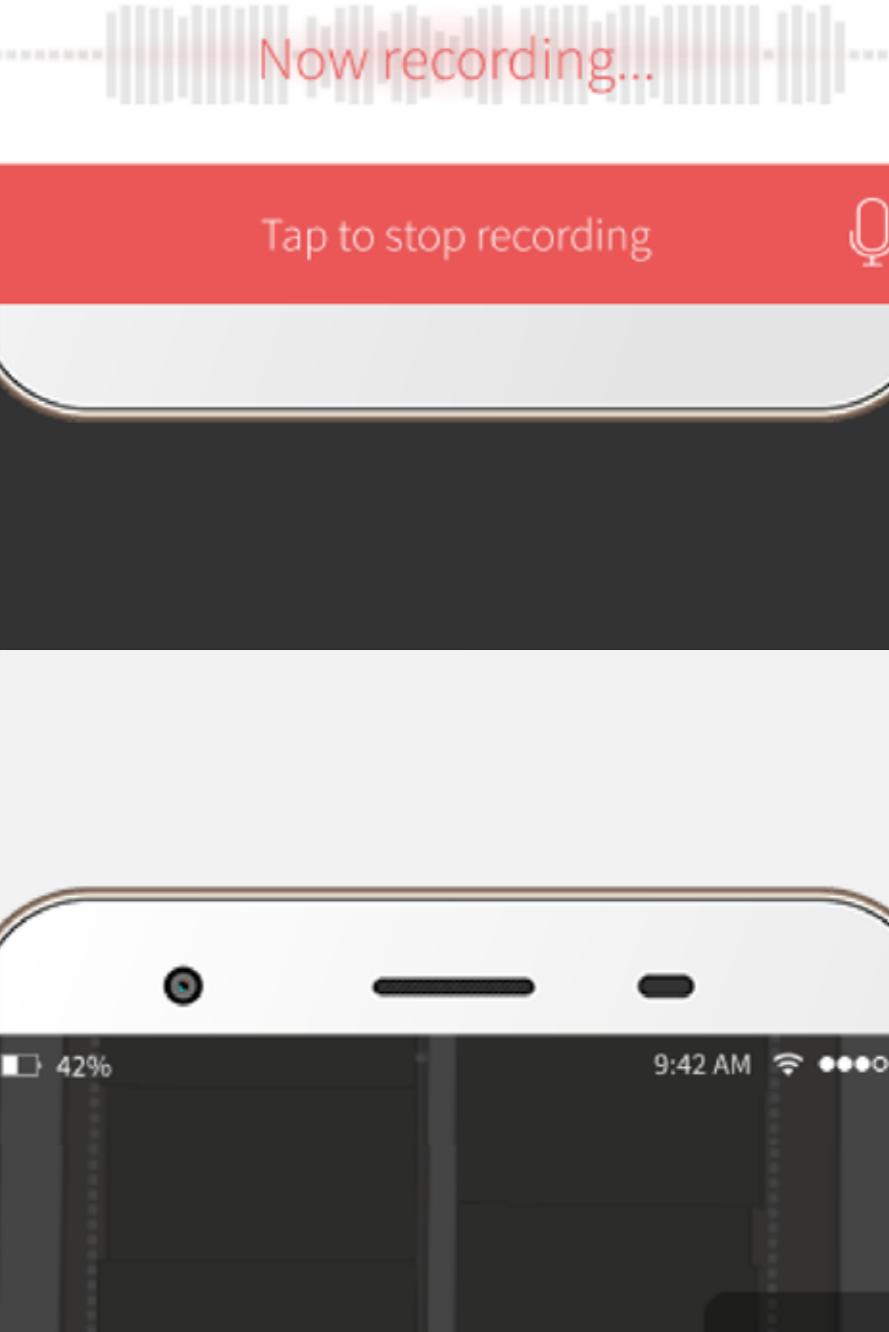

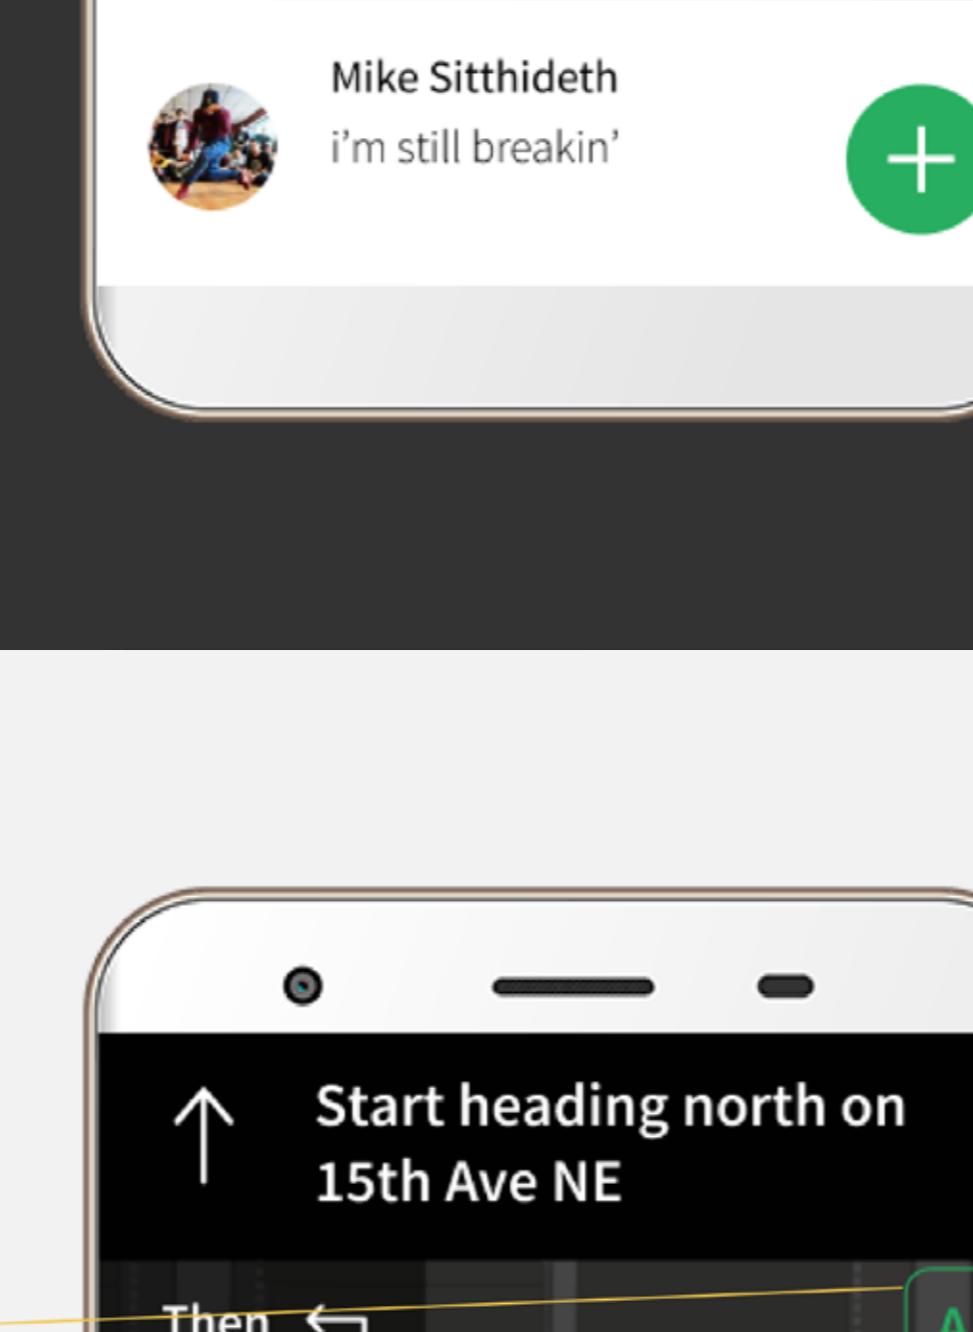

- Navigation gestures for dialer and camera on lock screen apply on home screen as well

App Cabinet / Notification

Notification

- To access the list of notifications, swipe up from the bottom of the screen

App Cabinet

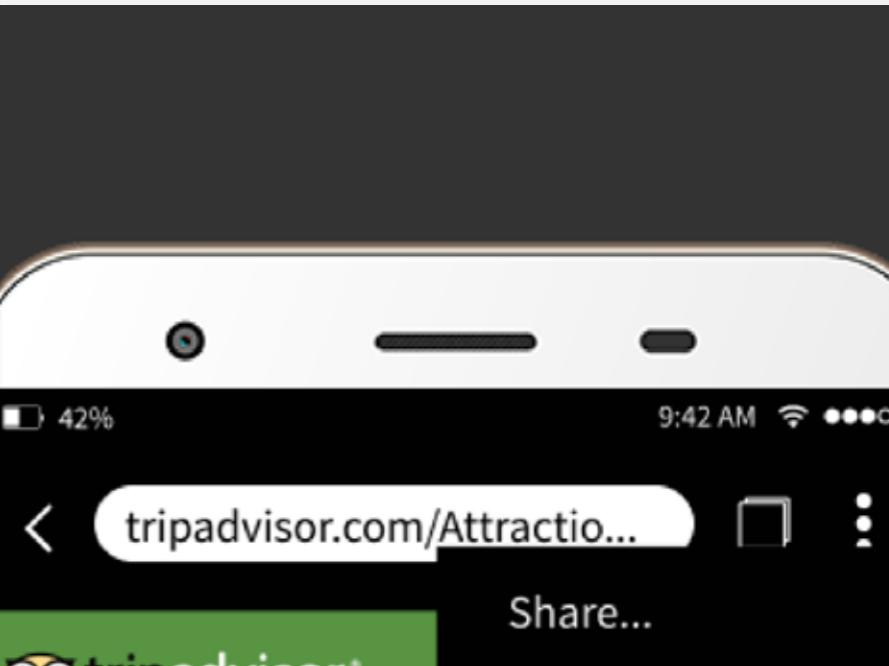

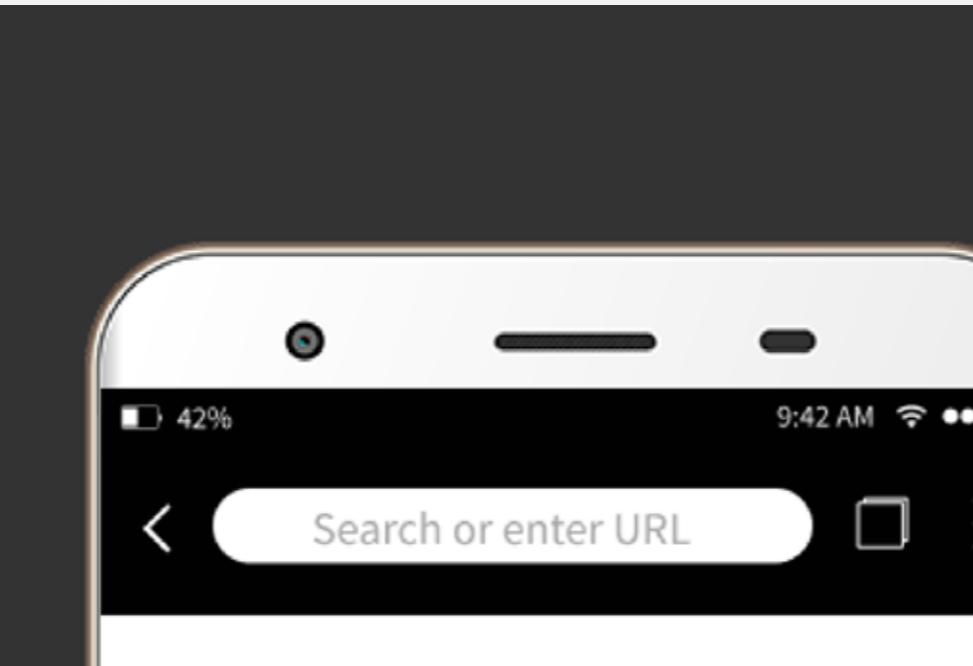

- Screen on the right of the notification stores all of the apps ordered by most recently used.

Calendar

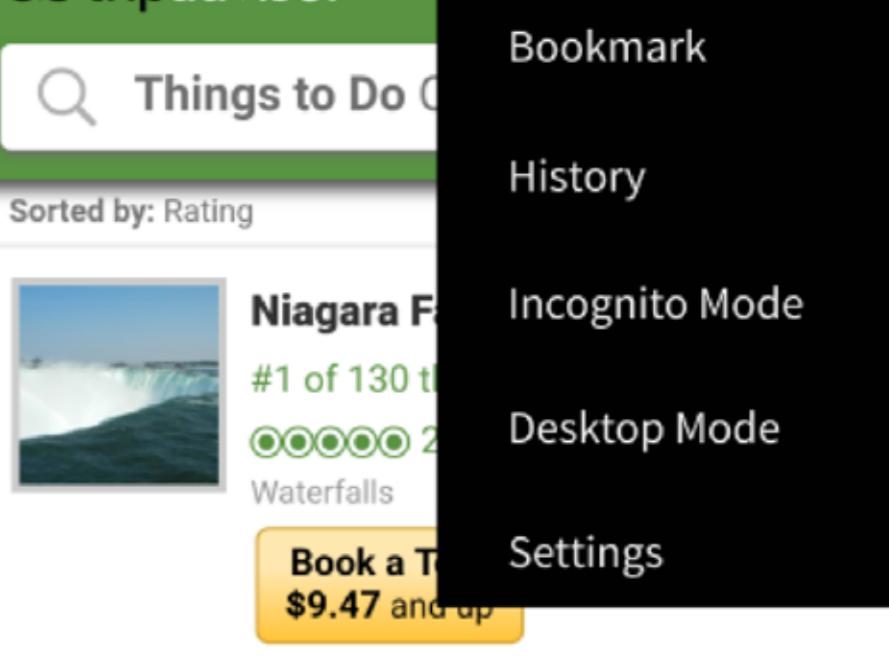

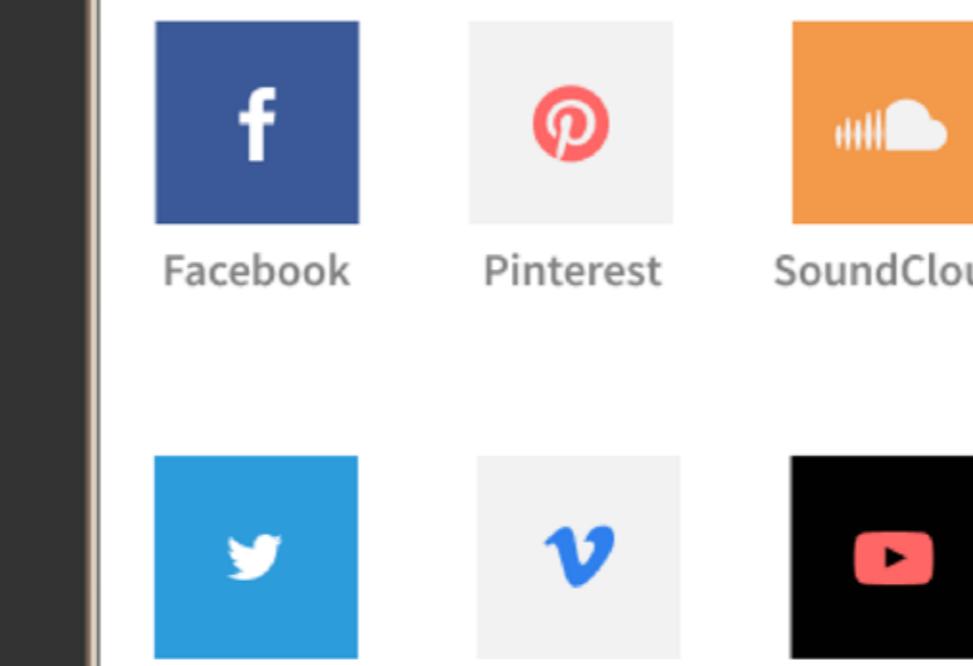

Month View

- Tap "March 2017" to change month and/or year
- Red dot indicates that there is at least one event
- Tap "Event view" for event view

Event View

- Scroll bar shows the dates of the month
- When the scroll bar hits the last day (i.e. 19), it goes back to top again with new range(20-31)
- Pinch out the two events or dates to add a new event

Camera / Photos

Photos

- Photos are organized by date with the most recent photos in the top left
- Photos are searchable using image recognition
- To switch to camera mode, swipe to the rightmost tab

Camera

- Swipe right to access photos app
- Swipe left to access different camera modes, such as video and panorama
- After you take a photo, you can immediately review it and decide whether to keep it (swipe left) or discard it (swipe right)

Music player

Discover Page

- This tab focuses on providing the user with new music
- Popular Nearby shows playlists of the most popular songs in nearby cities. Tapping on the arrow/label area will show the user a world view
- Green floating action button to get the song playing around you (Shazam)

Song View

- Swipe on the album art to skip/go back a song
- Drag the sound bars to scrub
- Tap or drag up the bottom black section to see lyrics, save, add to playlist, and other options

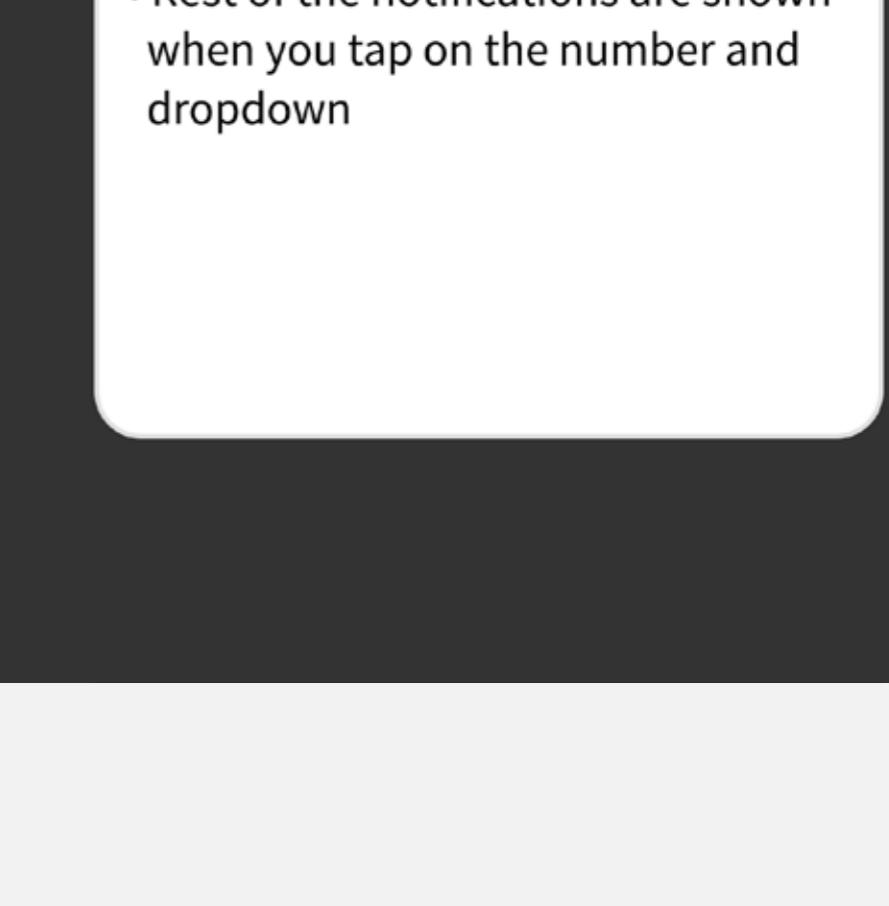

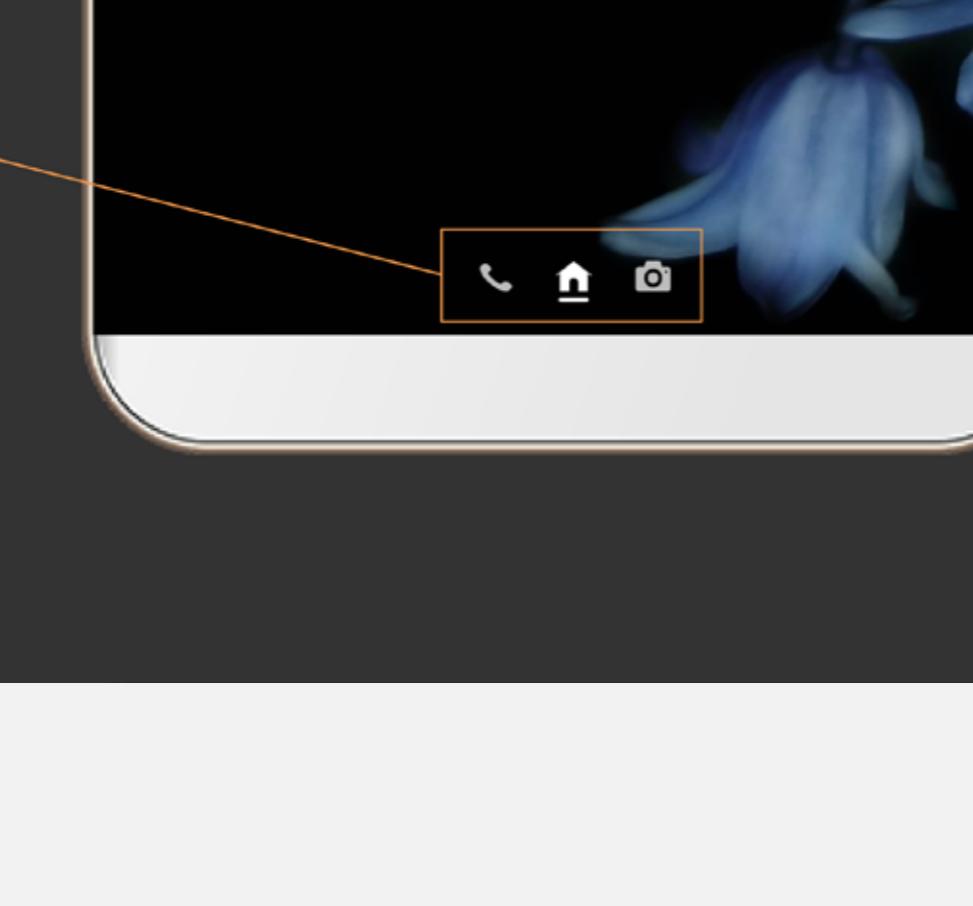

Detail view

- User can read the individual texts from a contact and respond by sending a text or a voice message
- When the microphone icon is toggled, the phone's microphone records the voice message. User can stop the recording at any time

Map

Navigation and AR

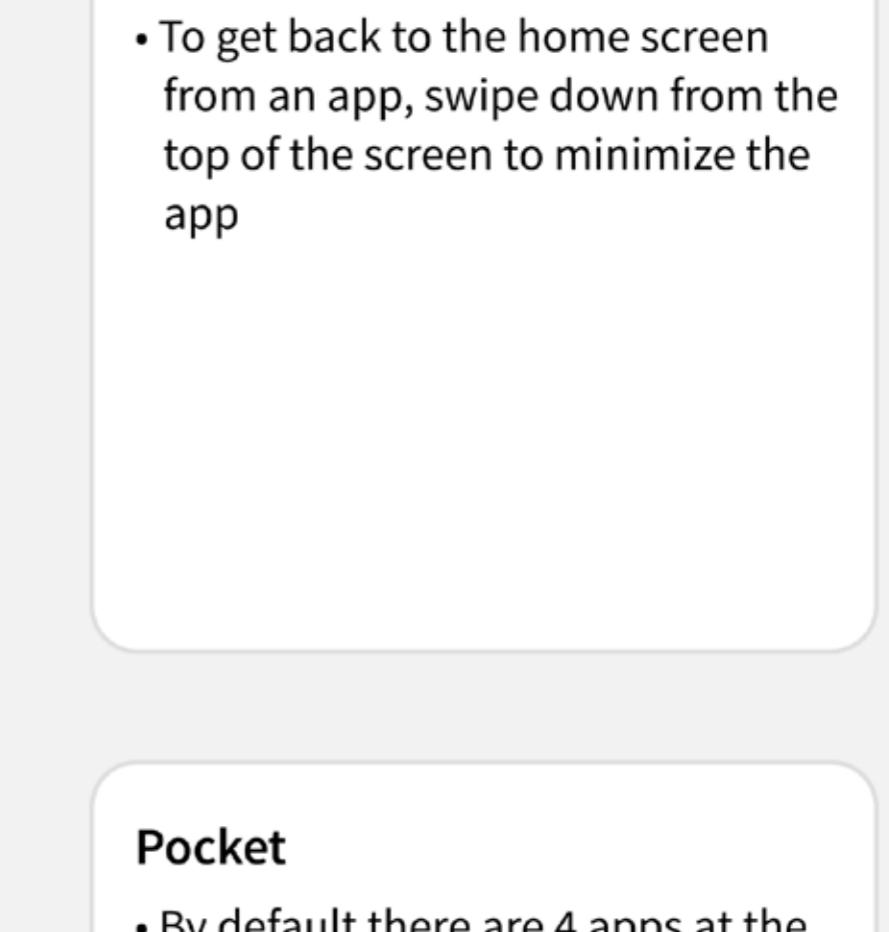

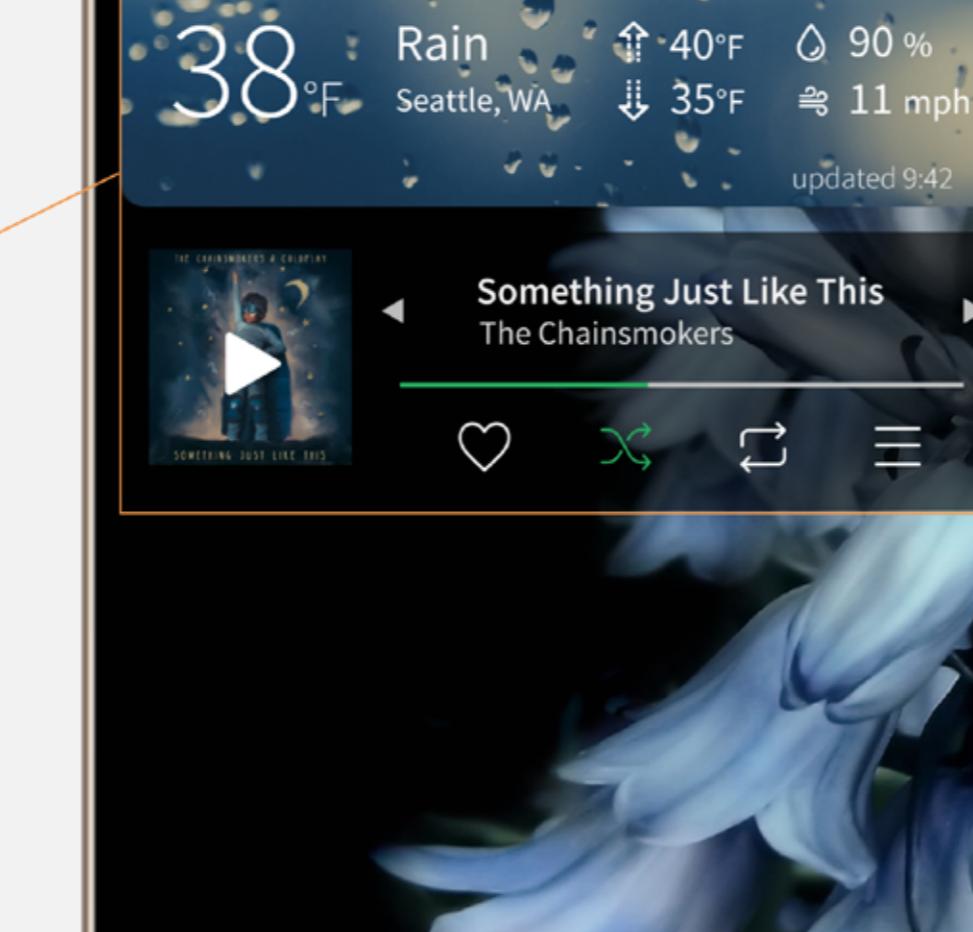

- Navigation view can be switched to AR (Augmented Reality) view by tapping on the AR button
- AR button is only shown when user is out of Drive mode

Switching mode

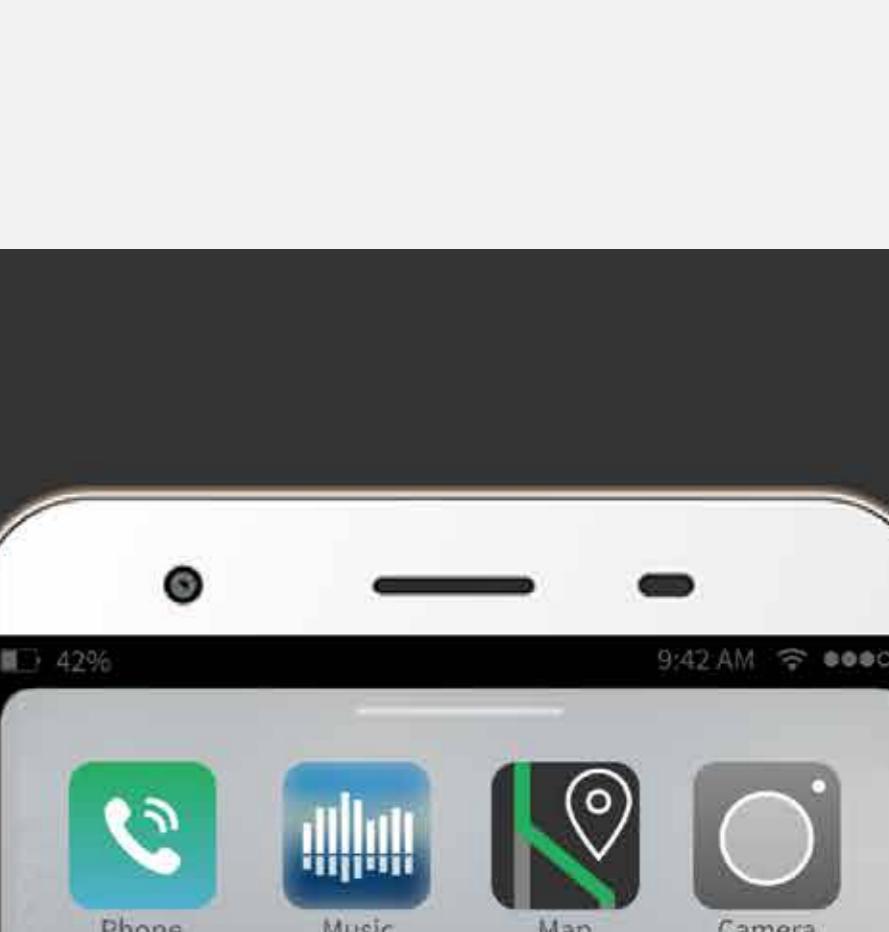

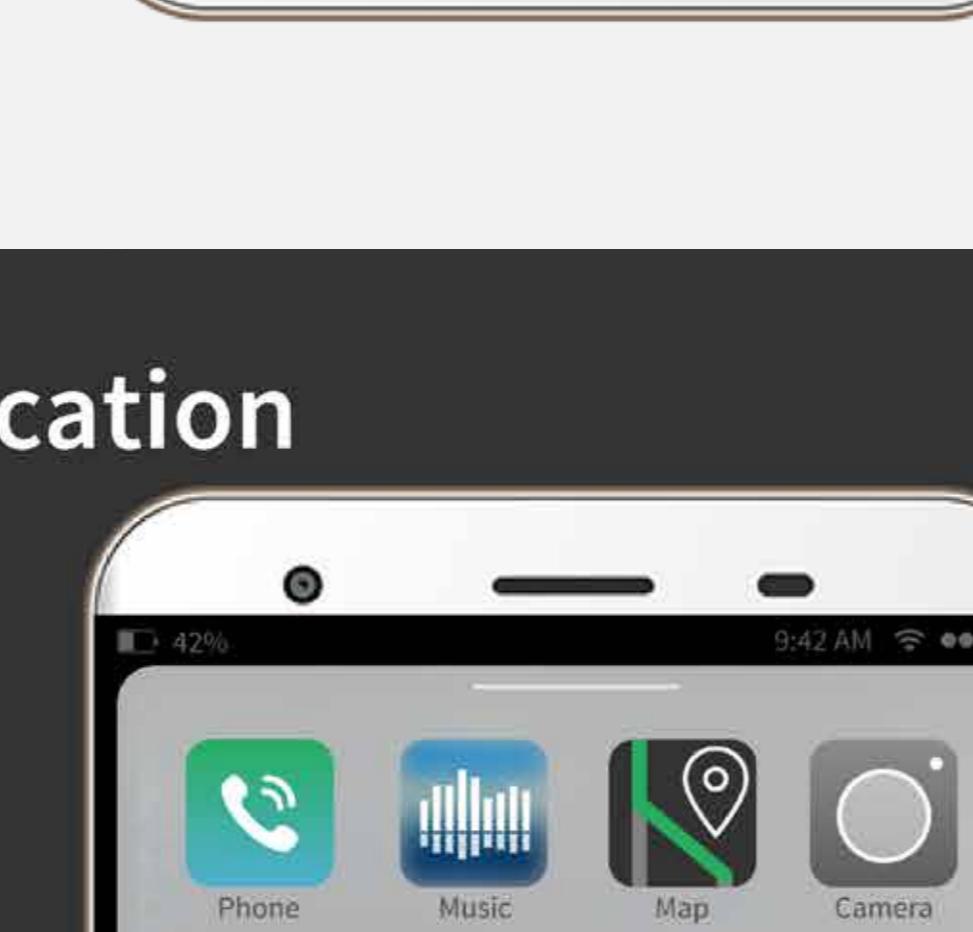

- There are 5 different modes in the Map app: Drive, Transit, Walk, Ride, and Friends
- Ride mode lets you search for rides using transportation network apps such as Uber and Lyft

- Friends mode lets you search for your friend's location and send a request to find your friend's location

Month View

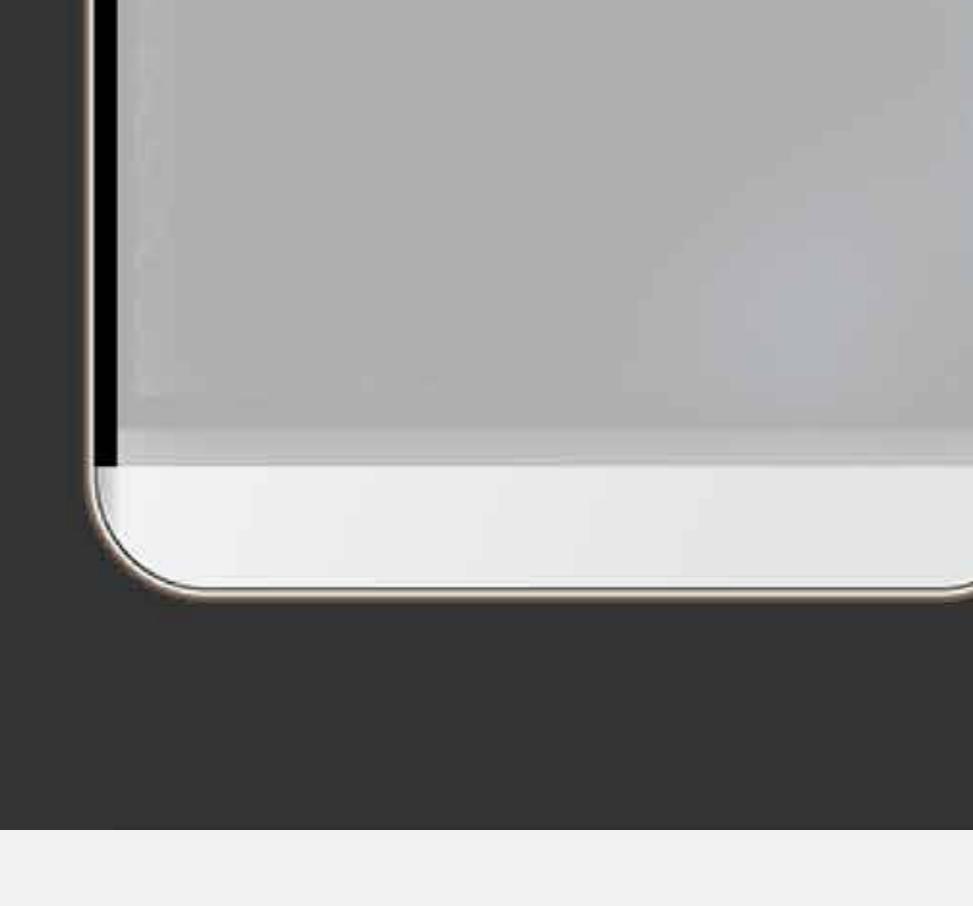

- Tap "March 2017" to change month and/or year
- Red dot indicates that there is at least one event
- Tap "Event view" for event view

Browser

The Landing Page

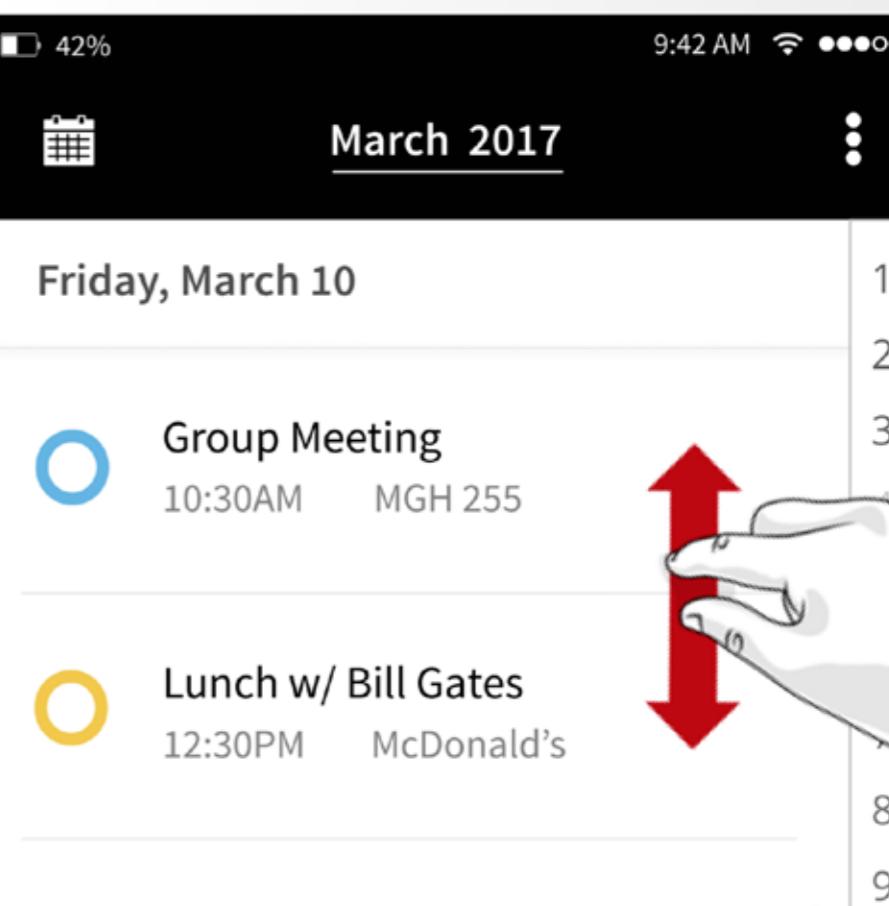

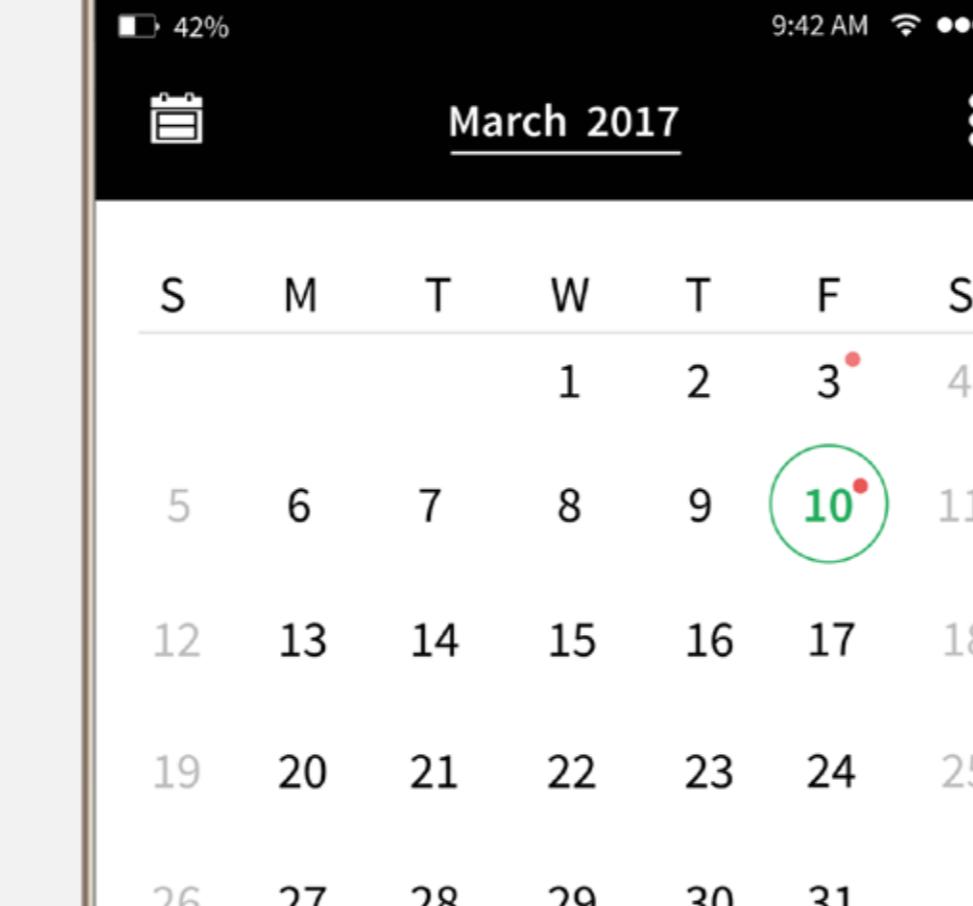

- User can tap between tabs to quickly navigate to that specific website
- Tapping "New Tab" will take users to a screen for a list of open tabs
- Swiping to the right will bring up a "Draw the Gesture" screen for quick bookmark access (set by user)

Browsing View Menu

- Tap "Share..." to open system tool for sharing through other apps
- "Bookmark" will prompt for a gesture input (user can opt not to have a gesture)

- Tap greyed "Bookmark" to remove

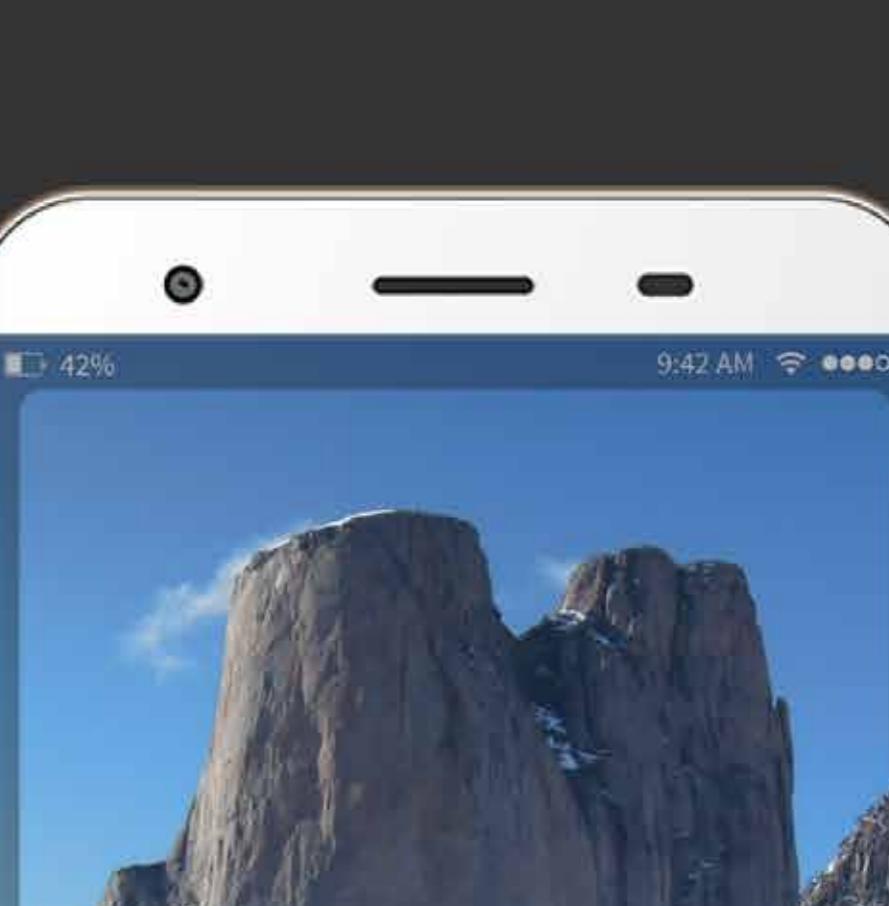

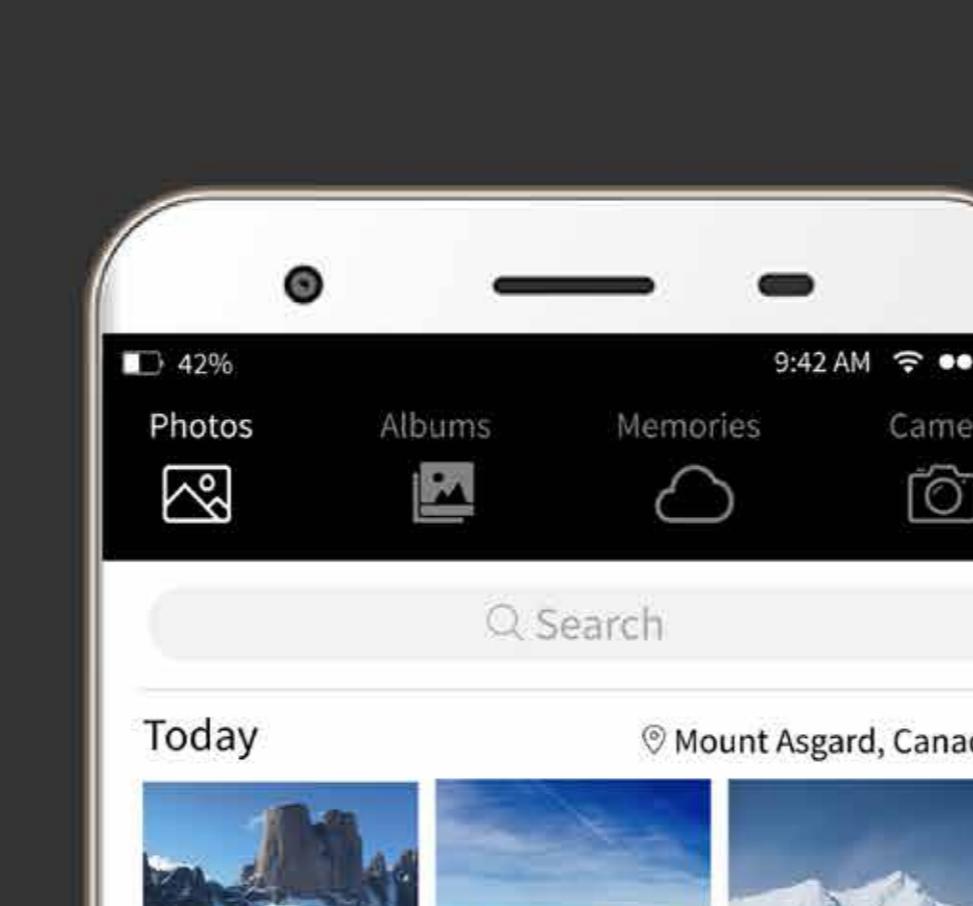

Message

List view

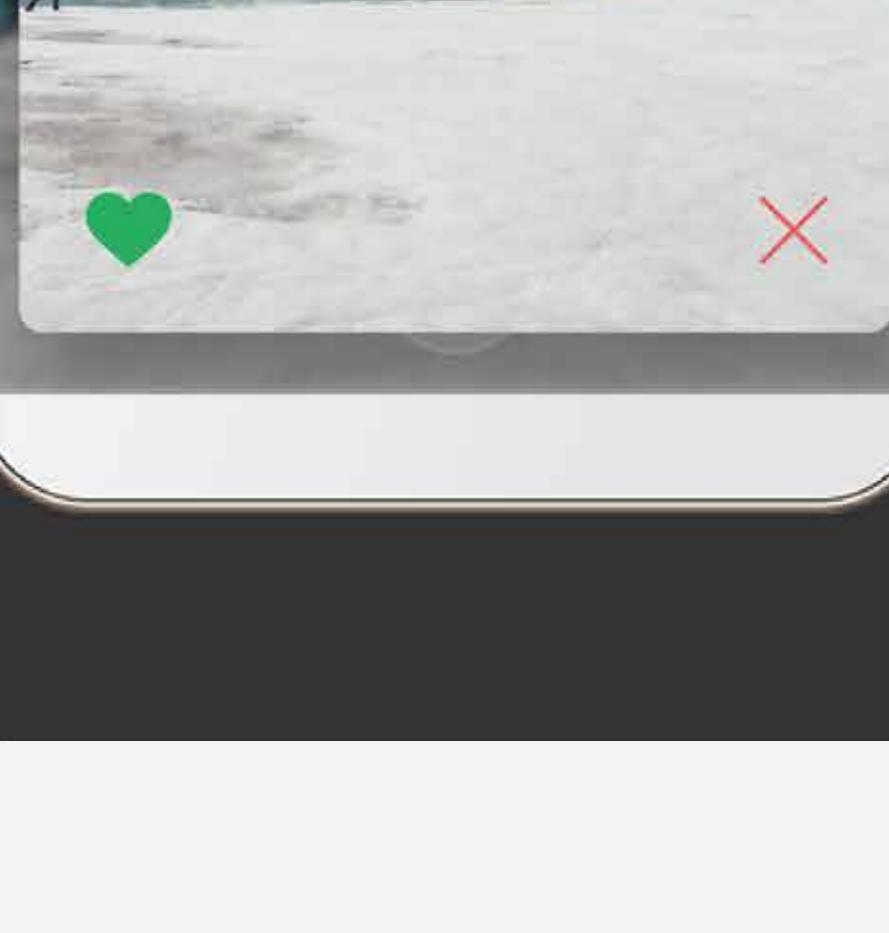

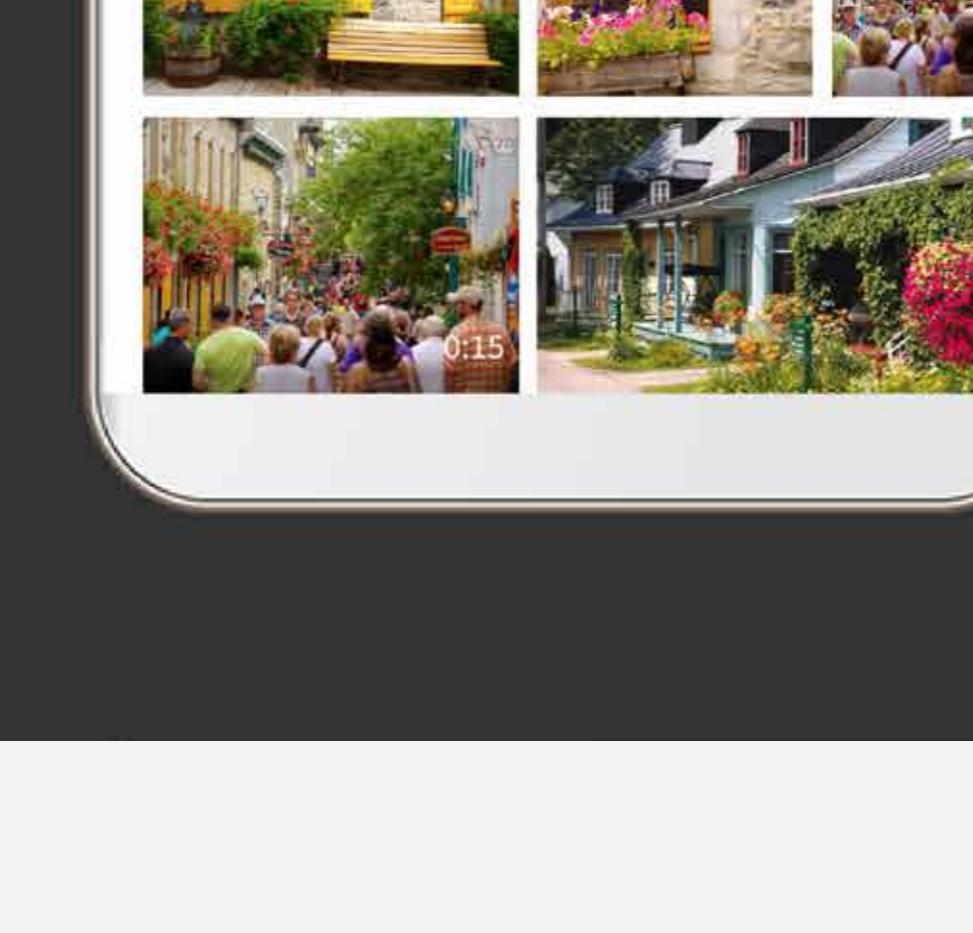

- User can tap between tabs to see messages from Message (default), Facebook, WeChat, and Voice Mail
- Red dots indicate notifications
- Green Floating Action Button enables the user to compose a new text message

- Tap on a message to go to Detail.
